EDUCATION

2014-2018: University of Texas at Austin ; BS Computer Science   GPA: 3.97

Classes	CS 312: Introduction to Programming
	CS 314: Data Structures
	CS 311: Discrete Mathematics
	CS 429: Computer Architecture

SKILLS

Programming:	Proficient in Java, Python, HTML/CSS, JS, AngularJS. Exposure to PHP, Meteor, iOS, SQL
	EventSpace: Worked with the client to create a sleek and minimalistic design. Utilized feedback from users and updated site with suggestions.
	Tracksidy: An AngularJS/WordPress hybrid music streaming application with a sleek and easy to use front end design. Allows producers to upload tracks which users can listen to and buy.
	IBM Vision Go: Created plugins for WordPress through PHP that could add streams, calendars and leaderboards to the website. Visualized data and created streams for RSS/Videos/Blog Posts that were updated throughout the conference.

EXPERIENCE

INTERN	Belfort Design Agency (2015 Summer)
	Worked on contracts to develop WordPress sites and web applications. Developed mainly in the front end, learned backend to integrate and visualize data. Became proficient in HTML/CSSS, JS, AngularJS, and became comfortable with Meteor and API use.
ACTIVITY	Teaching Assistant (Fall 2015)
	Undergraduate Teaching Assistant for Introduction to Programming, lead and taught discussion sections and helped students during office hours. Graded projects, assignments, and exams.
ACTIVITY	Editor, VibhaScope (2011 - 2014)
	Vibha, `http://www.vibha.org/`, is a nonprofit whose goal is to improve the lives of underprivileged children in India. I served as an editor of VibhaScope, a newsletter for Vibha news.
